DRILLING JARS!

We would respectfully announce to our customers and the public generally that we keep constantly on hand

Cast Steel Drilling Jars!

Which for Strength and Durability excel any Steel Lined Jar heretofore in use.

The Advantages We Claim

over Lined Jars are that being ALL STEEL, they are stronger than Jars composed partly of iron, that preventing a Steel surface to the rock, they are protected from wear on the outside and will keep their shape longer

We Warrant Them to Drill Fifteen Hundred Feet.

We also keep on hand

SPECIAL NOTICES.

Torpedoes — Nitro - Glycerin — Electricity.

The public, and particularly those interested in oil wells and blasting, are hereby informed that the exclusive right to use Nitro Glycerin in oil wells for torpedoing and blasting the said wells, and the exclusive right to use Electricity for exploding torpedoes in oil wells, have been licensed to the Roberts Torpedo Company

The patents for the use of Nitro Glycerin for any and all kinds of blasting, in rock or in oil wells, or for torpedoing the same, are owned by the United States Blasting Oil Company, and leased to the Nitro-Glycerin Company of New York The same company has the exclusive patents for blasting Nitro-Glycerin with electricity and all other known modes of exploding it

The undersigned personally, in 1866, obtained several letters patent for the exclusive right to blast Nitro-Glycerin, Gun Powder, Gun Cotton, and all other explosive substances, by electricity, made by any and all kinds of electric batteries, in oil wells. These patents are licensed to the Roberts Torpedo Company

The undersigned has been informed, and believes that divers and sundry persons are violating the patents above referred to, in and about the oil regions of Pennsylvania, under the instigation of George M Mowbray and his confederates. That they are torpedoing oil wells with Nitro-Glycerin manufactured by the said Mowbray and his confederates, at or near Painesville, Ohio under the name of the Lake Shore Nitro-Glycerin Company that they are bringing the said Nitro-Glycerin into the oil regions for the purpose of blasting and further the undersigned has been informed, and verily believes, that the said Mowbray and his confederates have been and are using and blasting rock and torpedoing oil wells, in violation of the patents granted to him, the undersigned by the United States government, for blasting rock and oil wells with electricity

Now this is to give the said Mowbray and his confederates, and all others concerned, notice that unless they give satisfactory assurances that they will desist from violating any and all of the aforesaid patents and also give a full account of moneys received by said violation acts and doings, and pay the said moneys to the order of the undersigned on or before the 14th day of January, 1870, suits will be commenced and prosecuted with all possible energy against all and severally the said Mowbray and confederates, and also the owners of the rock, works and oil wells blasted or torpedoed by the said Mowbray and confederates.

The undersigned desires to inform the proprietors of oil wells whether land or working interest, employing the said Mowbray and his confederates, that they will be looked to as the responsible offenders in the violation of the patents aforesaid, and that they must not expect to escape by the employment of irresponsible persons to torpedo their wells, as the patent laws hold responsible as offenders all persons who receive benefit by the said torpedoes

This notice is hereby given by the undersigned in his own behalf as patentee of electrical blasting and as President of the United States Blasting Oil Company, and of the Nitro-Glycerin Company of the City of New York

TAL P SHAFFNER

Titusville, Jan 13, 1870 -tf

Nitro-Glycerin—Giant Powder —Dynamite, Silicious, and other Nitroletic Powders.

This is to inform the public that the Nitro-Glycerin Company 78 and 80 Broadway, New York is prepared to furnish any of the above explosive substances at their factory in any desired quantity Price for Nitro-Glycerin at New York $1 35 per pound

The above named company is now preparing to manufacture the above explosive substances in the oil regions, and within sixty days will be prepared to sell Nitro-Glycerin at $1 50 to $1 60 per pound, delivered at Titusville

It must be remembered however, that the exclusive right to use Nitro Glycerin in oil wells has been leased to the Roberts Petroleum Torpedo Company, for a royalty of $20 per torpedo, which sum they have paid for the past three years

Any violation of their rights will be prosecuted by the company, regardless of time, labor or expense

All persons purchasing Nitro-Glycerin from the company will have the right to use all the patents belonging to it to blast with said purchased Nitro-Glycerin, except for oil wells, without further charge than the price paid for the Nitro-Glycerin These patents embrace all the present used modes of exploding with electricity for blasting in oil wells, rock work generally, &c.

TAL P SHAFFNER,

President of the Nitro-Glycerin Co, 78 and 80 Broadway, New York.

Nitro-Glycerin—Warning.

The public interested in torpedoing oil wells and blasting rock are hereby warned against using the Nitro-Glycerin manufactured by Geo M Mowbray and his confederates at Painesville, Ohio and all persons so using the said Nitro-Glycerin, or benefitted by its use, will be prosecuted in law

TAL P SHAFFNER,

President of the Nitro-Glycerin Co 78 and 80 Broadway, New York

Card.—The Steam Bakery delivery wagon will hereafter deliver goods only as they are ordered Orders left in the morning will be promptly filled in the afternoon We make this change for the accommodation of our patrons hoping to be able to deliver their goods with promptness and in better order

feb14 tf BERRY & NEILL

A Torpid System.—Sometimes, without any assignable cause, the physical strength and animal spirits give way, and a strange torpor falls alike on the body and intellect There is little or no pain perhaps, but the natural vigor and elasticity of the nervous and muscular system seems to have departed, and an indifference to the pleasures of life, and even of its grave responsibilities takes the place of that earnest interest in both which characterizes every well balanced mind when in a healthy condition

The state of partial collapse is often the premonitory symptoms of some serious malady It indicates unmistakably that the vital powers are languishing and need a stimulant In such cases the effect of a few doses of Hostetter's Stomach Bitters is wonderfully beneficial The great tonic wakes up the system from its torpor The secretions and the circulation receives anew impetus The relaxed nerves recover their elasticity under the influence of the specific like the slackened strength of a musical instrument in the process of tuning Lethargy and debility are replaced by energy and vigor, the spirits rise, and life that almost seemed a burden while the season of depression lasted becomes once more enjoyable That such a radical change should be produced by a remedy entirely devoid of the powerful alkaloids and minerals so extensively used in modern practice may seem incredible to those who pin their faith on the medical efficacy of active poisons but if these skeptics will take the trouble to enquire of those who have tested the corrective and alterative virtues of the Bitters under the circumstances described, they will find the statement to betrue

A Cough, Cold or Sore Throat.

Requires immediate attention as neglect often results in an incurable Lung Disease

BROWN'S BRONCHIAL TROCHES will most invariably give immediate relief For Bronchitis Asthma, Catarrh, Consumptive and Throat Diseases they have a soothing effect. Singers and public Speakers find them to clear and strengthen the voice.

Owing to the good reputation and popularity of Brown's Troches, many worthless and cheap imitations are offered, which are good for nothing Be sure and ask for Brown's the true

Brown's Bronchial Troches,

SOLD EVERYWHERE.

Titusville Morning Herald.

The Slave Market in Zanzibar.

A writer in *Chamber's Journal* says,

"The most curious feature and characteristic of Zanzibar is its slave market There are generally two sales daily, at which many hundreds of unhappy wretches are bought and sold Let us take a peep at this mart of human flesh and blood Leaving then the busier portion of the town, you pass up a long and quieter street, where fruit shops, tailors' and blacksmiths' stalls do most abound, passing by many a queer looking mosque and ancient temple, you come at length to a short lane which leads directly into the market. It is a large unpaved square, situated in the rear of the principal houses, its other three sides composed of shabby huts, some of which are used for examining any particular slave before making the purchase The first sale is generally most crowded The centre and largest portion of the square is filled with the slaves, who—their chains removed—are seated in rows on the ground and although they have received a full meal of shark and rice, to cause them to look cheery, appear about as happy as a flock of sheep newly resuscitated after spending three weeks beneath the snow in a Highland glen

"Walking about among these, looking in their mouths, digging their ribs, talking with and generally criticising them, is a band of the strangest, wildest, and withal most romantic looking men I ever witnessed outside of Drury Lane Theatre They are, for the most part, Arabs—gentlemen Arabs they style themselves, and the term is by no means often misapplied Tall, handsome fellows they are, too, and of all colors, from the pale, white face of the Persian to that of the black and savage African They are dressed in a flowing robe of white cotton, bound with scarlet or blue braid, reaching to the calf of the leg, and begirt with a beautiful broad belt, richly gilt and studded with gems From this depends the straight Arab sword—a right deadly weapon in practised hands—and one or two silver-mounted pistols, besides a jewelled dagger or dirk Over this dress is loosely and negligently worn a large flowing cloak of camel's hair, green, black or brown, sometimes often yellow The head is either shaven or the hair flows down to the waist in dark and glossy ringlets The head is bound with a golden turban, while sandals adorn his feet and, grasping in his right hand a tall spear, and dangling on his left arm a small round shield, studded with silver nails, there, in all his pomp and pride, struts your gentleman Arab.

'Of these gentlemen,' most of whom have come from Araby the Blest and the rosy shores of Persia, many are decidedly good looking Old and young, they are for the most part well formed and strong, and would make very fine soldiers Indeed, soldiers they are, although on their own account, and a strange, eventful life they lead, with their hand against every man and *vice versa* Yet, although some of the oldest are venerable and reverend looking, reminding one of the pictures of the Patriarchs by Dore, still the majority are very Shylocks, and, if cunning lurks in one eye—and there is no mistake about it—the very devil gleams from under the white and bushy eyebrow of the other They are for the most part captains and owners of northern dhows, and, although preferring peace, they are willing, for their cargo's sake, to fight to the death

"But the scale has commenced Look at that brute—that black fiend in human shape, himself a slave once, but raised to the dignity of slave drive, auctioneer and skipper of a miserable dhow, because inherently cruel! Mark how he seizes yon poor young trembling slave from her husband's side, and drags her by the arm swiftly through the crowd, catching the sound of the bids' and repeating them in his own barbarous dialect as he rushes on Two dollar and a half! Two dollar and a half! Three dollar! Three dollar! No more Three dollar and a half! Four! Four and a half" And mark—without emotion, if you can—the pitying, bewildered glance of her husband's eye as it follows his poor wife through the market. The *pelele* has been ruthlessly torn from her lip, and the rings from her ears, and she bows her head and weeps, as, with her disengaged hand, she modestly endeavors to cover her breast with the blue rag—her only clothing—which the hurrying wretch has disarranged Her husband is thinking perhaps of their home far away in the quiet forest, and of the nut brown maiden he wooed there not so long ago But she is sold, and hurriedly dashed into the arms of the buyer, and another, and another and still another are seized, to go through the same process The husband and wife, and many husbands and wives, will see no more of each other, in this world at least, and young and old, male and female, are dragged about, and still the sale goes briskly on

"The drivers or auctioneers—sturdy swarthy blacks, dressed, apparently, in guano bags, with a short knife in the girdle, often in their hurry come into collision with each other, then dreadful oaths and imprecations are heard, blows are struck and blood shed, till the 'gentlemen Arabs' rush in and with the butts of their spears belabor and separate the foamy-mouthed combatants The slaves are now rapidly changing hands Every Arab merchant is forming his own gang, chains are being slipped on again, and, two and two, they stand prepared for the march The din and bustle gradually subside, and soon the square is all but deserted Buyers and the bought are for the time separated, and while the former are regaling themselves on fruit and sherbet, preparatory to dining in gorgeous rooms and gilded saloons, the latter are treated worse than sheep, and left to pass the night in loathsome dens, slimy with damp, and filled with such creeping abominations as a Zanzibar dungeon only can produce

"But there is one corner of the slave market which deserves a little attention This is an out-of-the-way nook, set apart—start not, dear civilized civilized reader—for the exclusive disposal or vendition of the 'fairest of the fair' 'O Nanny, wilt thou gang wi' me?' is by no means the motto of a gentleman Arab, and because the number of ladies in his harem is the criterion of his rank, just as the number of horses or hounds may be of a 'fine old English gentleman,' he takes care to possess himself of as many as he can decently maintain I would not undertake to say how many wives the Sultan possesses, but I believe they are not much fewer those that were in the establishment of Solomon To the corner of the market in question flock the Arab dandies, those with the most richly jewelled sword scabbards, the blackest eyes and the greatest amount of attar of roses in their glossy ringlets.

"The maidens to be sold stand in a row, each one coyly twirling the end of her only garment—a few yards of bright-colored silk, thrown gracefully around her, or probably digging holes in the dust with the big toe of her plump little foot. They are mostly halfcaste Arabs, some of them both fair and pretty, although generally, to an English eye, partaking too much of the partridge to be killing Their long hair is neatly braided or plaited, and allowed to hang over their round shoulders. Around each ankle is a massive gold band, a bracelet of beads on each wrist, the one bare arm bound with gold, rings of ivory peleles in the ears, and a little jewelled padlock fastened through the left wing of the nose, and reclining on the dimpled cheek, and there she stands, gentlemen readers, 'a smile on her lip and a tear in her eye'—a wife for twenty dollars. Thither strut the peacocks of Arab captains, gay you show-owners, and swaggering sword-lovi Bedouins They have many a smiling question, too, to ask of the fair slaves, which they have often to repeat, and generally accompany with an encouraging 'chuck' below the chin, ere a simpering answer is elicited. The bidding sometimes rages fiercely over some of these coveted maidens; but although the buyers scowl and growl at each other, a quarrel seldom takes place, for the highest bidder gets the prize, and if there is any dispute, up goes the beloved lot again."

The Earthquake in San Francisco.

From the San Francisco Bulletin, Feb. 8.

There was a very lively and disagreeably suggestive shock of earthquake yesterday, which according to the observation of Thomas Tennent occurred at 10 minutes and 22 seconds past 12 M, with a duration of seven seconds, a direction of southeast and northwest. It was sufficient to cause a general panic, but no damage was done to buildings, either public or private, so far as we could ascertain at the time of going to press.

The excitement in the City Hall, which was thronged with people, was intense, and a general stampede was made for the doors, as public confidence in the stability of that structure is not very strong. In the Police Court, the examination of a gambling case was about commencing. Lawyers, officers and prisoners started for the door, but Judge Sawyer called out, "It is over, stop these men!" The Bailiff obeyed, and shut the door. In a few minutes there were not many people remaining in the Hall, and its vicinity was thronged The prisoners in the basement were in a tight place, and felt more than ever the value of liberty

At the hotels in the city the consternation was great. There was a universal stampede for the outside. Ladies and children screamed, and many of the former fainted, through fear and terror Every street was black with people before the shock had fairly ceased.

At the Washington street Baptist Church there was a large congregation in attendance on funeral ceremonies. There was the silence of the tomb, and the choir had just struck up "The Rock of Ages," when the earth lifted and trembled. All knew instantly what was at hand. The pastor and congregation were seized with the impulse to run, and a rush was made for the door Four or five ladies fainted and fell down in the aisles; others screamed and called for help Several teams in front of the church ran away Some of the ladies were put in carriages and conveyed home in an unconscious state Fortunately no one was seriously injured.

Immediately after earth's trembling had subsided, the streets presented an interesting panorama. The man who was not freightened—but who still trembled from fear—could be seen talking and making gestures. Then there was the man who was sure great damage had been done, almost dislocating his neck to look at the upper stories of tall buildings and straining his eyes to find a shattered pane of glass. To him every little crevice appeared double its real size, and every other building seemed out of plumb. A buxom matron of about forty-five summers was wending her way along Battery street, near Washington, when the shock commenced, and she was perfectly demoralized for the time being Contrary to the general estimate of maternal affection, she deposited her cherub on the curbstone and started off on a clean run. She subsequently remembered that she had left something behind, and returned for the babe

It was fortunate that the shock occurred about the time for recess, so that many of the school children were playing in the yards. In the schools which were in session at the time, the teachers generally were cool and self-possessed, keeping the children under control At the Girls' High School, on Bush street, near Stockton, the shock was sensibly felt, and a little plastering fell from the walls, but the young ladies did not appear much disconcerted The school was dismissed after the vibrations ceased At the branch of the High School and the Training School in the Jewish Synagogue, on Sutter street, quite a panic occurred, and the shock is said to have been very vigorous. Several of the misses fainted, but no one was injured In the Denman Grammar School building, the shock was quite severe, but no panic occurred. The teachers quietly took their stations at the doors, and after a few minutes the scholars were dismissed for the day There are 600 young ladies attending the Rincon Girls' Grammar School, and we learn from Mr. Knowlton, Principal, that not one left her seat until the school was dismissed.

The waters of the Bay showed no unusual commotion. The people around the wharves seemed little frightened, and evidently felt comparatively secure in their location The Custom House was not damaged, so far as could be ascertained from a brief examination, but the occupants of the building made no delay in getting into the street. The old Merchants' Exchange had some of the old crevices widened a little, but not enough to accomplish any harm. The United States District Court was in session at the time of the shock, and Judge Hoffman did not offer to adjourn it. Some of the spectators, however, suddenly had business on the street, which required their immediate attention In the entry of the Bank of British North America, a woman leant against a wall perfectly paralyzed with fear, and by way of shutting out the danger ostrich-like, she drew her shawl over her head and waited the coming of the enemy.

Miscellaneous.

A young lady in Philadelphia advertises that she will give $30,000 to any respectable young man who will marry her.

Among the passengers on the missing City of Boston are Allen Ebbs, a well-known New York bookseller, and his wife.

An Iowa paper hoists the name of U. S. Grant for President in 1872 It expects a change in the post-office about that time, perhaps.

North Carolina imposes no restrictions upon the marriage of first cousins, and it has already received several emigrants from New Hampshire

The workingwomen of Paris receive a very small compensation for their labor. Thus, in 1860 there were 17,208 females who earned from 10 to 25 cents a day, 88,340 who earned from 30 to 80 cents a day, and only 800 who earned from 90 cents to $1 40 a day

The Pall Mall *Gazette* learns that "within a few weeks nearly 14,000 copies of a cheap edition of Channing's works have been subscribed for; a remarkable testimony to the popularity of his productions—sermons though they be for the most part—considering that the author has been dead for a quarter of a century.

The city of Panama will soon be lighted with gas The pipes are all laid, and the lamp posts all erected, and the retorts will be ready in a few weeks

An old farmer whose son had lately died, was visited by a neighbor, who began to condole with him on his loss. "My loss!" exclaimed the father, "no such thing; it was his own loss—he was of age"

A writer in the Brooklyn *Union* thinks that the title of Mr. Dicken's new story is "ominous of the decadence of a brilliant genius which has shone upon the world with undimmed lustre for thirty-five years."

The Franking Abuse.

The Postmaster General transmitted on the 28th ult. to the Senate a communication in reply to a resolution of that body requesting information relative to the blank petitions, etc., recently sent from that department asking the abolition of the franking privilege, and in regard to the transportation of free mail matter. He states that the number of blank petitions sent out was 75,009, and the number of accompanying circulars was 28,000. The total cost of both circulars and petitions was $499.56, which was defrayed by the office of the Congressional printer. No part of the expense was charged against any fund appropriated for the use of the use of the Postoffice Department. The petitions and circulars were prepared under the direction of the Postmaster General in accordance with the views expressed by the President in his late message, and in response to what was believed to be a very general wish of the people that the franking privilege should be abolished. No attempt was made on the part of the department to influence the views of postmasters respecting abolition of the privilege. They were simply requested to give citizens who were in favor of the measure an opportunity to so express themselves.

The Postmaster General states that the returns of the transportation or free mail matter are yet too incomplete to furnish the data called for in the resolution. He submits, however, a statement based upon such returns as have been received, embracing most of the principal cities. These returns are imperfect in many respects, but exhibit the following results reported from 454 post offices for the month of January: Number of free letters sent, 666,901; postage thereon at the regular rates, $117,399 73; weight of free printed matter sent, 346,194 pounds; postage thereon at regular rates, $42,334 96. Total cost of free matter sent from 454 post offices, $159,734 00. The Postmaster General says that, considering this exhibit, it is safe to estimate that if full returns had been received from all the offices for the month of January, the aggregate amount would have exceeded $200,000, or at the rate of $2,400,000 per annum.

In response to the request to communicate to the Senate the facts on which the allegations of fraud and abuse in the exercise of the franking privilege were founded, in the petitions sent out by the Department, the Postmaster General says:

It is impossible to give precise information upon that point, owing to the fact that franked matter is always sealed, and the law does not authorize the breaking of a seal for the purpose of examination; but even the comparatively small amount of free matter now returned for the Dead Letter Office discloses many cases of abuse where books, papers, and circulars not printed by order of Congress, and even business and social circulars, have been transmitted under cover of a frank. If the facts of each particular case could be ascertained, remedies could be applied, and it would then only be necessary to reform the franking privilege. The system itself must be denounced because it invites to fraud, with a promise of impunity; and hence I repeat, what I have already said, in the language of another, there is no middle ground between no franking and boundless franking. Although unable to give facts in detail, it is yet notorious that the frauds which have been perpetrated under cover of the franking privilege have been enormous. Beside the cases mentioned above, which are constantly occuring, I hope I may be permitted, without offense, to state that in times of excited political campaigns, the various parties do not hesitate to employ it to transmit whatever of printed matter they may have wished to disseminate. This practice has grown into a bad custom which can only be abolished by repealing the privilege under which it finds shelter.

The recent agitation for the repeal of the privilege has resulted in a large increase in the sale of stamps and stamped envelopes for the month of January, 1870, over the same month in 1869. This gain amounts to $311,552 50. He then reiterated views in favor of the immediate and total repeal of the franking privilege. In his judgment no system can be devised consistent with the rights and interests of the people that can tolerate its longer continuance.

The Postmaster-General then contrasts the postal revenue of Great Britain at the two-cent rate, and without the franking privilege, with the three-cent rate of the United States with the franking privilege, showing a much larger relative revenue is derived by the former Government. He closes as follows:

"I believe sincerely that the time has come to attempt such reforms as will make our postal service worthy of our country and people. I believe with equal sincerity that these reforms cannot be made while the franking privilege is allowed to continue. Hence, I must earnestly renew my recommendations for its repeal. Doubtless, a measure of so much importance may be safely committed to an enlightened and patriotic Congress."

The Rochefort Failure.

The detailed accounts which have now come to hand of the Rochefort Red Republican demonstration in Paris, indicate that the telegraphic reports exaggerated, instead of underestimating their importance. The whole affair was a notorious failure, when compared with the Paris movements in the past. It was a parody, and not a copy, of the terrible revolts of the men in blouses in 1789, in 1830 and in 1848. Those engaged in it were principally thoughtless or idle boys in their teens, and did not belong to the laboring or industrial classes. Rochefort behaved without courage or gallantry, and suffered himself to be carried off by a few policemen from the crowd of his supporters. He and his fellows only committed, in fact, imprudence enough to bring discredit upon their cause, without displaying any heroism to gild it. We think the Paris Reds will have done with Rochefort, and that, when next they make a point against the government, they will choose a leader who has, what Rochefort has not, the talent for the crisis. For the present, Napoleon is firm upon his throne, with not the least prospect of being upset.

SALT FIELDS.—as rich in brine as those recently discovered in Goderich, Canada, have been discovered in Sanilac county, Michigan. The lands comprise about 300 acres, and lie about six miles inland from Lexington, the county seat of Sanilac. This district is underlaid by the Marshall sandstone, and a black bituminous slate, which burns freely, but is not to be taken as an indication of coal. These formations are the same as yield petroleum in Canada West. At the depth of 1,000 or 1,200 feet is a copious salt formation—the Salina salt basin. This the is source of the brine at Syracuse, N. Y., and at Port Austin, St. Clair, and Mt. Clemens, Michigan, and Goderich, Canada.

THE free trade men suffered a defeat in the House of Representatives on Monday last. Mr. Allison, of Iowa, was about to offer a resolution declaring the tariff for revenue only, and that its burdens should fall equally on all. Mr. Schenck headed him off by getting a delegate from Idaho to offer a resolution declaring that the sense of the House was in favor of a protective tariff, as well as a tariff for revenue. Mr. Schenck demanded the previous question. Mr. Wood moved to have the resolution tabled, which was lost. The resolution was passed by a vote of 113 to 51.

A Good Administration.

WHAT PRESIDENT GRANT HAS DONE FINANCIALLY.

We make the following extract from a speech made by Mr. Dawes in Nashua, New Hampshire, on Saturday:

THE QUESTION OF PUBLIC ECONOMY.

Is it, fellow citizens, because the Democratic party will be more economical in the administration of the public affairs than the Republican party has been or is likely to be, that they put forth this claim for power? Nothing is so essential to public affairs as honesty and economy, and unless the Republican party can answer the question that it has been economical, it has no right to ask further confidence at the hands of the people. And unless the Democratic party has either in its past record or in something that it holds out in the future, some encouragement to a people burdened with taxes and groaning under a debt which has been bequeathed to them by this Democratic party through the war, then whatever may be the answer as to the Republican party, the Democratic party could not be trusted. When did the Democratic party have any reputation for economy in the administration of public affairs?—take its history. Go back to Mr. Pierce's administration, in the time of profound peace, with no occasion for any expenditure of public money, and how did he leave it? With an addition of some twelve millions to the debt of the nation. And what did Mr. Buchanan do? He added seventy millions more of debt. In time of profound peace, with prosperity in the land and revenues increasing and overflowing, he added seventy millions to the twelve millions of debt that existed at the end of Mr. Pierce's administration. Take this last administration and the very last year of it, with all the resources of the country, based upon the war basis, to meet and liquidate the public debt, with every obligation upon the administration, instead of paying a dollar of the debt, Johnson added six millions to it. Is there anything, then, in the history of the past of the Democratic party that encourages the people to think that if the power were bestowed to their hands to-day they would be economical in the expenditure of the public money? How is it with the Republican party? Have they any claim to honesty and economy in public affairs? They make short work of the account up to this day. I took it from the Treasurer's book yesterday as I state it to you.

PRESIDENT GRANT'S ECONOMY.

Mr. Johnson received in the last year of his administration $368,000,000, and he incurred a debt in addition to this of $6,000,000, so that he expended in his last year $370,000,000. In the first year of General Grant's administration, with no higher rate of taxes, but, on the other hand, with reduced taxation in some particulars, he has gathered into the Treasury out of his officials' hands $394,000,000 instead of $368,000,000 from the same taxes, and instead of expending all of that in the current expenses of this year he has paid eighty million dollars of the public debt out of it. So that he has to expend only three hundred and fourteen millon dollars, against three hundred and seventy-four million dollars spent in the last year of Andrew Johnson's administration, making just the difference of sixty million dollars in one year. This is from the books. He has collected twenty-six million dollars more in this present year than Andrew Johnson did in the last year, and twenty million dollars of that is from the internal taxes of the land, not a mill higher and on some articles much lower than it was last year. Why has he collected twenty millions more? Because there has been less of it stolen.

INTERNAL REVENUE — UNDIVIDED PROFITS.—The Commissioner of Internal Revenue has issued the following circular to Assessors, which is of interest to many taxpayers:

It is enacted in section 117 of the act of June 30, 1864, as amended by section 13 of the act of March 2, 1867, that in estimating gains, profits and income, there shall be included "the share of any person of the gains and profits of all companies, whether incorporated or partnership, who would be entitled to the same of divided, *whether divided or otherwise*, except the amount of income received from institutions or corporations whose officers are required by law (sections 120 and 122) withhold a certain per centum of the dividends made by such institutions, and pay the same to the officer authorized to receive the same."

It is believed that heretofore there has been great negligence on the part of Assistant Assessors in searching out and requiring returns of such profits, when undivided.

You will give this matter you special attention and will issue such definite instruction to your assistants as will insure full and accurate returns of this class of income and income and gains.

Torpedoes — Nitro-Glycerin — Electricity.

The public, and particularly those interested in oil wells and blasting, are hereby informed that the exclusive right to use Nitro-Glycerin in oil wells for torpedoing and blasting the said wells, and the exclusive right to use Electricity for exploding torpedoes in oil wells, have been licensed to the Roberts Torpedo Company.

The patents for the use of Nitro-Glycerin for any and all kinds of blasting, in rock or in oil wells, or for torpedoing the same, are owned by the United States Blasting Oil Company, and leased to the Nitro-Glycerin Company of New York. The same company has the exclusive patents for blasting Nitro-Glycerin with electricity, and all other known modes of exploding it.

The undersigned, personally, in 1866, obtained several letters patent for the exclusive right to blast Nitro-Glycerin, Gun Powder, Gun Cotton, and all other explosive substances, by electricity, made by any and all kinds of electric batteries, in oil wells. These patents are licensed to the Roberts Torpedo Company.

The undersigned has been informed, and believes that divers and sundry persons are violating the patents above referred to, in and about the oil regions of Pennsylvania, under the instigation of George M. Mowbray and his confederates. That they are torpedoing oil wells with Nitro-Glycerin manufactured by the said Mowbray and his confederates, at or near Painesville, Ohio, under the name of the Lake Shore Nitro-Glycerin Company; that they are bringing the said Nitro-Glycerin into the oil regions for the purpose of blasting; and further the undersigned has been informed, and verily believes, that the said Mowbray and his confederates have been and are using and blasting rock and torpedoing oil wells, in violation of the patents granted to him, the undersigned, by the United States government, for blasting rock and oil wells with electricity.

Now this is to give the said Mowbray and his confederates, and all others concerned, notice that unless they give satisfactory assurances that they will desist from violating any and all of the aforesaid patents, and also give a full account of moneys received by said violation acts and doings, and pay the said moneys to the order of the undersigned, on or before the 14th day of January, 1870, suits will be commenced and prosecuted with all possible energy against all and severally the said Mowbray and confederates, and also the owners of the rock, works and oil wells blasted or torpedoed by the said Mowbray and confederates.

The undersigned desires to inform the proprietors of oil wells, whether land or working interest, employing the said Mowbray and his confederates, that they will be looked to as the responsible offenders in the violation of the patents aforesaid, and that they must not expect to escape by the employment of irresponsible persons to torpedo their wells, as the patent laws hold responsible as offenders, all persons who receive benefit by the said torpedoes.

This notice is hereby given by the undersigned in his own behalf, as patentee of electrical blasting and as President of the United States Blasting Oil Company, and of the Nitro-Glycerin Company of the City of New York.

NEWS BY CABLE.

PARIS, Mar. 2.

The magistrate who was struck by Prince Murat, and who was to prosecute him before the High Court of Juftice, has withdrawn his complaint.

MADRID, March 2.

The rumors of an extensive rising of Carlists in Northern Spain are contradicted, but it is admitted agents of the party are very active just now in all the provinces, and have set on foot a movement at various points, which, however, so far, is insignificant and easily checked.

All the private property of ex-Queen Isabella remaining in Spain has been embargoed by her husband, to prevent the waste of their children's inheritance.

The Countess of Girgent, daughter of Isabella, has commenced legal proceedings against her husband for squandering her dowry.

LONDON, March 2.

In the house of Commons to-day, the bill requiring railroads companies to place foot-warmers in all their carriages, was killed by an amendment requiring them to supply hot brandy, rugs and overcoats.

LONDON, March 2.

The story of a steamer's funnel having been seen standing up out of the water in Cortigan Bay, off the coast of Ireland, is generally discredited here Hope of the safety of the City of Boston is by no means abandoned and the underwriters are so confident that they have reduced the premiums, which had been advanced fifty per cent.

ST. PETERSBURG, March2.

There was a great crowd of people present at Curlingame's obsequies, including nearly all the Americans in the city. The remains of Burlingame have been embalmed, preparatory to removal to the United States. Yesterday the Emperor called upon Mrs. Burlingame.

PARIS, March 2.

The carnival yesterday passed off very quietly.

The French Government has warned its representative at Rome to use great caution in his efforts to protect the institution of Catholic states.

Later news from Paraguay states Lopez's army has been somewhat depleted by desertion, but he still holds his ground against Brazilians.

LONDON, Mar. 2.

J. Roberts, Sr., ex-billiard champion, challenges the world at a billiard match, to occur within two months for two or five hundred pounds a side.

Wreck of the Steamship Golden City.

SAN FRANCISCO, March 2.

Particulars of the loss of the Golden City, which left here Feb. 18, for Panama, with a valuable cargo, including a cargo of teas and 400 passengers, are received. On the morning of the 22d ult, about 7 o'clock, she went ashore near Point Larzaro, Lower California, about 15 miles from the Bay of Santa Maria. The passengers, 400 in number, baggage and treasure were landed with little difficulty, the sea being smooth, but the location was barren and far from habitations. A party was sent immediately to Point Larzaro to erect a signal and keep a lookout for the Colorado, which was signalled about noon of the 24th, but it was impossible for the steamer to receive the sufferers aboard, on account of the heavy surf, and they were compelled to walk to Santa Maria over a barren waste enduring great sufferings from hunger and thirst. Several passengers were left behind. Only a small quantity of provisions and water were saved from the wreck, but fortunately the Colorado arrived soon, or intense suffering would have resulted. When the wreck commenced breaking up the cargo drifted ashore, and casks containing liquor were broken open by the passengers, and drunkenness and disorder ensued. Fearing bloodshed would result if this order of things was not put a stop to, a party organized to destroy the liquor as fast as it came ashore. The passengers had no confidence in Capt. Comstock and paid no attention to his orders. An indignation meeting was held on board the Colorado, and resolutions were passed that in their opinion the wreck of the Golden City was due to incapacity or gross carelessness of the commanding officer, and much unnecessary suffering on shore could be traced to the same source. The passengers, with but few exceptions, reached here by the Colorado last night. The baggage and treasure was left on the beach under a proper guard.

Fight between Edwards and Collyer.

MYSTIC, Conn., Mar. 2.

The fight between Billy Edwards and Sam Collyer for the light weight championship of America and $1,000 a side came off this morning on Mystic Island, about seven miles from New London, and resulted in a victory for Edwards after 41 rounds, the combat lasting 47 minutes. Edwards gave Collyer the first blow, which sounded over the ring and drew forth loud cheers. In the second round Edwards struck Collyer a terrific blow on the forehead, drawing first blood and knocking Collyer off his feet. Edwards had the best of the fight from the beginning, punishing Collyer and frequently knocking him down. In the forty-first round Collyer came up looking distressed, but fought gamely. Edwards, however, struck him three times in succession, every blow sounding over the ring, and the third knocking him down as if dead, when his seconds threw up the sponge. Edwards was loudly cheered. Collyer was carried to a hotel where he vomited and remained insensible a considerable time. Both going to, during and returning from the fight, the crowd, comprising adherents of both sides in nearly equal numbers, behaved in an irreproachable manner.

CONGRESSIONAL PROCEEDINGS.

Senate.

WASHINGTON, March 2.

A joint resolution authorizing the Northern Pacific Railroad Company to issue its bonds for the construction of a road, and secure the same by mortgage, was discussed without action until the expiration of the morning hour.

Mr. Trumbull, from the Judiciary Committee, reported back the bill relative to taking the census, and asked its reference to the Committee on Revision of Laws. So ordered.

The funding bill was then considered.

Mr. Sumner said that the mass of financial obligations should be promptly adjusted in some new form at smaller interest; taxes must be reduced, the payment of the national debt must be left in part to posterity, and specie payments must be provided for. As the bill was a substitute for one he had previously introduced, he compared them at considerable length, and thought the committee had not improved the original bill. He said that at the proper time he should move an amendment.

Mr. Sumner moved to amend the first section by increasing the amount of bonds therein provided for from $400,000,000 to $500,000,000, by providing for a 10-40 instead of a 10-20 bond, and also that the proceeds shall be applied to the payment of the bonds of 1862, the first series of bonds, and which if he could so express himself, had become fly-blown. He wished to wipe that obligation away.

Mr. Sherman said the bonds of 1862, were held entirely abroad, and he could not see any advantage to the government by redeeming those bonds alone; somebody had abused the old 5-20s and threatened to pay them off in greenbacks, and it was because of that insult on our public credit, he supposed the Senator from Massachusetts now proposed to give holders of them a monopoly. He thought United States bonds should all stand upon the same footing, and that no good reason could be shown why five per cent. should be given holders on first and only 4½ to others.

Mr. Morton said we did not wish to issue a bond that would be rejected as proof a failure. He therefore inquired if the Senators from Ohio and Massachusetts had any evidence that four per cent. bonds issued by any government had ever been sold for more than 84 cents on the dollar.

Mr. Sumner said he did not know of any four per cent. ever being put on the market at par.

Mr. Sherman said he believed four per cent. bonds had been put out at par by Switzerland.

Mr. Chandler said the proposition of Mr. Sumner, to take from bonds actually in the treasury 11½ per cent. and put it to the credit of the sinking fund without the consent of the owners, was simply repudiation as a safe way of arriving at a point aimed at by the Finance Committee. He favored a proviso making it compulsory upon all national banks to deposit four per cent. bonds for their circulating notes, thus requiring them to pay down two per cent. for the valuable franchise of banking.

House.

The House went into Committee of the Whole on the Indian appropriation bill. Having proceeded to within two pages of the end of the bill, the committee rose.

Mr. Butler, of Mass., offered a resolution instructing the Judiciary Committee to inquire by what means and by whom the privileges of the House had been invaded by the publication of testimony taken before the Committee on Banking and Currency in advance of its being reported to the House. Also what action is necessary to protect Members of Congress from conspiracies of office brokers and others to make charges against members for extortion. Adopted.

Mr. Maynard offered a resolution calling on the Secretary of the Navy for information as to the loss of the United States steamer Oneida. Adopted.

Various executive documents were presented.

Adjourned.

General News.

NEW YORK, March 2.

The World's Port au Prince correspondence says that Rear Admiral Porter, commanding the United States North Atlantic Squadron, entered the harbor of Port au Prince on the 9th inst. with the flagship Severn and ironclad Dictator, and upon landing had an interview with the Haytien authorities. He announced that the United States had formed an alliance with President Baez, of San Domingo, and that he had been sent there to say any aid given Cabral would be considered as an act of hostility towards the United States and would provoke hostilities in return; that the United States was determined to use its power to prevent any aid being given to Cabral, and he had been sent to these waters with sufficient force to carry this determination into execution, and that he would carry out his instructions whether this succor was carried to Cabral under the Haytien or any other flag. This menace created much excitement in Hayti, and was regarded in some quarters as an act of war. The Admiral, after the interview, steamed to Cape Haytien. The Haytiens assert that English vessels are conveying support to Cabral with the concurrence of the British Admiral, and that if Admiral Porter is consistent in warning off all sympathizers with Cabral he will necessarily come in conflict with the British in those waters.

Col. Leopold Van Gilsea, a Prussian soldier, who organized and commanded the De Kalb regiment in the late American civil war, died at his residence in this city last night.

A terrific explosion of nitro-glycerine occurred to-day at Fleetwood race course, now being made, in Morrisiania. John Sullivan, a workman, was killed and nine others severely wounded.

Mr. Meehan is better and the doctors say he will recover.

Georgia.

WASHINGTON, March 2.

The Senate Judiciary Committtea, through Mr. Edmunds, made a report today in the case of Georgia. They hold that many orregularities have taken place in the organization of the Legislature under the reconstruction acts of Congress, but that it is not advisable for Congress to take further steps on the subject.

Nitro-Glycerin—Giant Powder—Dynamite, Silicious, and other Nitroletic Powders.

This is to inform the public that the Nitro-Glycerin Company, 78 and 80 Broadway, New York is prepared to furnish any of the above explosive substances at their factory, in any desired quantity Price for Nitro-Glycerin at New York, $1.35 per pound.

The above named company is now preparing to manufacture the above explosive substances in the oil regions, and within sixty days will be prepared to sell Nitro-Glycerin at $1.50 to $1.60 per pound, delivered at Titusville.

It must be remembered, however, that the exclusive right to use Nitro-Glycerin in oil wells has been leased to the Roberts Petroleum Torpedo Company, for a royalty of $20 per torpedo, which sum they have paid for the past three years.

Any violation of their rights will be prosecuted by the company, regardless of time, labor or expense.

All persons purchasing Nitro-Glycerin from the company will have the right to use all the patents belonging to it to blast with said purchased Nitro-Glycerin, except for oil wells, without further charge than the price paid for the Nitro-Glycerin. These patents embrace all the present used modes of exploding with electricity for blasting in oil wells, rock work generally, &c.

TAL. P. SHAFFNER,
President of the Nitro-Glycerin Co., 78 and 80 Broad way, New York.

Card.—The Steam Bakery delivery wagon will hereafter deliver goods only as they are ordered. Orders left in the morning will be promptly filled in the afternoon. We make this change for the accommodation of our patrons hoping to be able to deliver their goods with promptness and in better order.

feb14-tf BERRY & NEILL.

A Torpid System.—Sometimes, with out any assignable cause, the physical strength and animal spirits give way, and a strange torpor falls alike on the body and intellect. There is little or no pain, perhaps, but the natural vigor and elasticity of the nervous and muscular system seems to have departed, and an indifference to the pleasures of life, and even of its grave responsibilities, takes the place of that earnest interest in both which characterizes every well balanced mind when in a healthy condition.

The state of partial collapse is often the premonitory symptoms of some serious malady. It indicates, unmistakably that the vital powers are languishing and need a stimulant. In such cases the effect of a few doses of Hostetters's Stomach Bitters is wonderfully beneficial. The great tonic wakes up the system from its drowse. The secretions and the circulation receives anew impetus The relaxed nerves recover their elasticity under the operations of the specific, like the slackened strength of a musical instrument in the process of tuning. Lethargy and debility are replaced by energy and vigor, the spirits rise, and life that almost seemed a burden while the season of depression lasted, becomes once more enjoyable. That such a radical change should be produced by a remedy entirely devoid of the powerful alkaloids and minerals so extensively used in modern practice, may seem incredible to those who pin their faith on the medical efficacy of active poisons, but if these skeptics will take the trouble to enquire of those who have tested the corrective and alterative virtues of the Bitters under the circumstances described, they will find the statement to be true.

A Cough, Cold or Sore Throat.

BROWN'S BRONCHIAL TROCHES

Requires immediate attention, as neglect often results in an incurable Lung Disease.

BROWN'S BRONCHIAL TROCHES will most invariably give instant relief. For Bronchitis, Asthma, Catarrh, Consumptive and Throat Diseases they have a soothing effect. Singers and public Speakers use them to clear and strengthen the voice.

Owing to the good reputation and popularity of the Troches, many worthless and cheap imitations are offered, which are good for nothing. Be sure to OBTAIN the true

Brown's Bronchial Troches,
SOLD EVERYWHERE.

PETROLEUM MARKET.

OFFICE OF THE MORNING HERALD,
TITUSVILLE, March 2, 1870—5 P. M.

The market upon the creek opened quiet, but steady, this morning, and there were bids made upon both ends of the road at figures corresponding with those at the close of the previous day. During the afternoon there was a slight improvement noticeable, and at the close the market presented a better appearance, bids upon the Upper creek being made at an advance five cents on those of the forenoon.

On the Lower creek $4 25 and $4 30 were offered but there were few sellers at these figures, until after eleven o'clock when $4 35 was offered, but without meeting ready response from holders who are awaiting a still further advance in prices. Upon the Upper road $4 15 was offered by the majority of buyers, though during the afternoon $4 20 was bid, and at $4 25. The markets closed with a better feeling all around. Outside quotations exhibit a firmer tendency,

Pittsburgh Oil Market.

PITTSBURGH, March 2—12 m.

Petroleum dull; Crude 12c; Refined 25c.

New York Oil Market.

NEW YORK, March 2—1:20 p. m.

Petroleum market dull and unchanged.

Philadelphia Oil Market.

PHILADELPHIA, March 2—1 p. m.

Market steadier. Business rather moderate. Some call from speculators.

Sales—2000 bbls. standard white 26½ and tinct from April to June; 500 bbls each month 28½c.

Cleveland Oil Market.

CLEVELAND, March 2.

Petroleum dull and quiet.

Refined held at 26½@27c. for standard white in large lots. Retail parcels 2@3c. advance on these figures.

Crude dull at $5 75 per bbl.

Antwerp Petroleum Market.

ANTWERP, March 2.—6 p. m.

PETROLEUM—Refined opened that 39½f.

Dry Goods Market.

NEW YORK, March 2.

The agony in the print market is over and confidence is restored by action of agents this day in reducing their rates as follows:

Merimac D fancies 12c., shirtings 11½; chintzes 14c.; W cheek and stripe 13½c; fancies 13½c; Cochico prints fancies 12½c.; robes 11c., Allen's shirting and fancies 11½c; Frocks 12c., American 11½; Glouchester 11½; Manchester 11½; Lonsdale 11½; Oriental 11½ Richmond 11½ Amoskeag 10c; Simpsons 11c; Albion 11@12c. The Carlston ginghams have been reduced to 22½.

New York Produce Market.

NEW YORK, March 2.

Cotton closed heavy and lower; Sales 5,800 bales at 25c for middling uplands.

Flour closed dull and trifle lower on low grades extra.

Nitro-Glycerine.—A rumor having reached the undersigned, although no papers have been served, that the U. S. Blasting Oil Company of New York intend applying for an injunction for infringement of Patents by the writer and others, this is to notify the public, that this issue will be squarely met, and the assertions of T. P. Shaffner will now be tested by a decision of the United States District Court of Western Pennsylvania. To that decision the public is referred, and will judge of the veracity of the parties in interest accordingly, and it is hoped the public mind will no further be disturbed by these conflicting assertions hereafter

MISCELLANEOUS.

SPECIAL NOTICE.

Schenck's Pulmonic Syrup,

Seaweed Tonic and Mandrake Pills, will cure Consumption, Liver Complaint and Dyspepsia, if taken according to directions. They are all three to be taken at the same time. They cleanse the stomach, relax the liver, and put it to work; then the appetite becomes good; the food digests and makes good blood; the patient begins to grow in flesh; the diseased matter ripens in the lungs, and the patient outgrows the disease and gets well. This is the only way to cure consumption.

To those these medicines Dr J. H. Schenck, of Philadelphia, owes his unrivalled success in the treatment of pulmonary consumption. The Pulmonic Syrup ripens the morbid matter in the lungs, nature throws it off by an easy expectoration, for when the phlegm or matter is ripe, a slight cough will throw it off, and the patient has rest and the lungs begin to heal.

To do this, the Seaweed Tonic and Mandrake Pills must be freely used to cleanse the stomach and liver, so that the Pulmonic Syrup and the food will make good blood.

Schenck's Mandrake Pills act upon the liver, removing all obstructions, relaxes the ducts of the gall bladder, the bile starts freely, and the liver is soon relieved; the stools will show what the Pills can do; nothing has ever been invented except calomel (which is a deadly poison and dangerous to use except with great care), that will unlock the gall bladder and start the secretions of the liver like Schenck's Mandrake Pills.

Liver Complaint is one of the most prominent causes of consumption;

Schenck's Seaweed Tonic is a gentle stimulant and alterative, and the alkali in the Seaweed, which this preparation is made of, assists the stomach to throw out the gastric juice to dissolve the food with the Pulmonic Syrup, and it is made into good blood without fermentation or souring in the stomach.

The great reason why physicians do not cure consumption is, they try to do too much, they give medicine to stop the cough, to stop chills, to stop night sweats, hectic fever, and by so doing they derange the whole digestive powers, locking up the secretions, and eventually the patient sinks and dies.

Dr. Schenck, in his treatment, does not try to stop a cough, night sweats, chills or fever.

Remove the cause, and they will stop of their own accord. No one can be cured of Consumption, Liver Complaint, Dyspepsia, Catarrh, Canker, Ulcerated Throat, unless the liver and stomach are made healthy.

If a person has Consumption, of course the lungs in some way are diseased, either tubercles, abscesses, bronchial irritation, pleurisy, adhesion, or the lungs are a mass of inflammation and fast decaying. In such cases what must be done? It is not only the lungs that are wasting, but it is the whole body. The stomach and liver have lost their power to make blood out of food. Now, the only chance is to take Schenck's three medicines, which will bring up a tone to the stomach, the patient will begin to want food, it will digest easily and makegood blood; then the patient begins to gain in flesh, and as soon as the body begins to grow, the lungs commence to heal up, and the patient gets fleshy and well. This is the only way to cure Consumption.

Where there is no lung disease, and only Liver Complaint and Dyspepsia, Schenck's Seaweed Tonic and Mandrake Pills are sufficient without the Pulmonic Syrup. Take the Mandrake Pills freely in all bilious complaints, as they are perfectly harmless.

Dr. Schenck, who has enjoyed uninterrupted health for many years past, and now weighs 225 pounds, was wasted away to a mere skeleton, in the very last stage of Pulmonary Consumption, his physician having pronounced his case hopeless, and abandoned him to his fate. He was cured by the aforesaid medicines, and since his recovery many thousands similarly afflicted have used Dr. Schenck's preparations with the same remarkable success. Full directions accompanying each, make it not absolutely necessary to personally see Dr. Schenck, unless the patients wish their lungs examined, and for this purpose, he is professionally at his Principal Office, Philadelphia, every Saturday, where all letters for advice must be addressed. He is also professionally at No. 32 Bond Street, New York, every other Tuesday, and at No. 35 Hanover Street, Boston, every other Wednesday. He gives advice free, but for a thorough examination with his Respirometer, the price is $5. Office hours at each city from 9 A. M. to 2 P. M.

Prices of the Pulmonic Syrup and Seaweed Tonic each $1.50 per bottle, or $7.50 a half dozen. Mandrake Pills 25 cents a box. For sale by all druggists.

THE RAMSDELL NORWAY OATS.

Late experiments made by well known farmers, satisfactorily prove that one acre of straw of these oats is as valuable as an acre of the best hay. It is more nutritious, and cattle eat it better.

FORTY-FIVE FIRST PREMIUMS have been awarded these oats at the late State and County Fairs, a larger number than was ever before awarded to any agricultural production in a single year. Over

TWENTY-FIVE FARMERS' CLUBS have now indorsed the Norway oats as far superior to all others. Adam Rankin, proprietor of Premium Farm of Illinois, says: "My yield is 90 bushels from a single acre, and the grain is excellent. One bushel produced as much as five bushels of the 'Surprise Oat.'"

There are a dozen different varieties of oats in the market, all being sold as "Norways." Look out for counterfeits. Price $7 50 per bushel; $1 per half bushel; $2 50 per peck, by standard of 32 lbs to a bushel. Address D. W. RAMSDELL & Co., 218 Pearl st., N.Y., or 171 Lake st., Chicago, Ill., or E. K. Engines for Sale—C. A. Durfey.
Soda Fountain for Sale—United States Hotel.
Grand Social Ball—Corinthian Hall.
Second National Petroleum Co.—J. M. Bruce.

THE *un*-pleasant days of Spring have come.

THE Producers' and Manufacturers' Bank is to be organized on Saturday Evening.

ST. PATRICK'S DAY will be celebrated in this city by a Ball at Corinthian Hall. See advertisement.

THE Council last evening accepted the proposal of property holders on East Main street, to build an iron bridge across Chruch run, the city grading the street, and providing the abutments.

THE new hotel of Parshall & Guild is to embody. also a magnificent opera house, which will have a seating capacity for over twelve hundred persons, and will in style and finish not be inferior to any in Western Pennsylvania.

MEADVILLE talks of erecting a monument to "the honored dead." This may appropriately include the new county, which is about the deadest thing we know of, though there will be a score or two of office seekers to run on that "issue" in October.

MISS ANNA DICKINSON will lecture in Corinthian Hall on the 23d inst. The simple announcement is a sufficient guarantee for a crowded house. On two former occasions Miss Dickinson drew the largest audiences ever assembled here at a popular lecture.

IN another column will be found a letter from a prominent citizen of Venango county in favor of annexation. The letter was not designed for publication, and we therefore withhold the writer's name. We are very confident that the views which he has expressed will meet the general approbation of his own people.

IF there is any truth in the old adage when "March comes in like a lion it will go out like a lamb," we may expect the present month to make its exit in a very calm and serene manner. Tuesday was one of the few winter days we have experienced this season, and the snow storm of the previous night has afforded excellent sleighing in town and country.

STEALING CLOTHES.—One Patrick Kelley was arraigned before Justice Strouse on Tuesday to answer a charge preferred against him by Chief of Police Rouse, of robbing clothes lines in the Fourth ward. Kelley demanded a jury trial, and he got it, and after the jury had listened to the testimony in the case, they rendered a verdict of guilty without leaving their seats. Kelly was thereupon sentenced to pay a fine of $50 and undergo six months imprisonment, which is paying a high price for two second-hand shirts. Depredations of this sort have been very frequent of late, and the example made of Kelley may put a stop to them for a while.

Re-Union of the 57th Pa. Vet. Vols.

The second annual re-union of this Regiment was held at Mercer, Pa., on the 22d ult., and was a decided success, quite a large number of the survivors of the regiment being present.

At 3 o'clock p. m. a meeting was called at the court house, where business pertaining to the organization was transacted. The President, Col. Wm. B. Neeper, called the meeting to order, when the minutes of last meeting were read and adopted.

A committee of five was appointed to nominate officers for the ensuing year. The following members were then nominated and elected:

President, Major S. C. Simonton; Vice President, W. S. Eberman; Secretary, Capt. J. D. Moore; Corresponding Secretary, Capt. E. C. Strouse.

Letters from Col. Sides and Lieut. Col. Perkins were read, in which they expressed their sincere regret that business prevented them from joining their old comrades of the 57th.

A committee had visited Gen. Meade and Gov. Geary for the purpose of securing their attendance, but urgent business also prevented their attendance.

After some discussion the time for holding the future re-unions of the regiment was fixed upon the 11th day of April. This is the anniversary of the regiment's first fighting, which occurred in front of Yorktown, Va., in 1862.

It was moved and carried that the regiment hold its next re-union at Titusville, Pa., on the 11th day of April, 1871.

Capt. A. H. Nelson, Lieut. T. J. Crossley and Lieut. John A. Silliman, of Titusville, were appointed a committee to make arrangements for the next meeting.

The meeting then adjourned to meet in the Court Room at 7 o'clock, p. m. Long before the appointed hour the room was densely packed with members of the regiment and citizens of Mercer, including a large number of ladies. The meeting being called to order, a beautiful address of welcome was delivered by J. G. White of the Mercer Soldiers' Orphans' School. It was admirably responded to by the President, Maj. Simonton.

Capt. Strouss then read a memorial of the regiment, giving a synopsis of its history from the time of its organization until its discharge. The regiment was organized at Harrisburg, Pa., in October, 1861. The men composing it were principally from the counties of Mercer, Crawford, Bradford and Susquehanna. It participated in nearly all the battles fought by the Army of the Potomac.

Of the 850 men that originally composed the regiment, then were but 97 men and 1 officer left when it was mustered out in June, 1865.

Col. Neeper moved a vote of thanks to Capt. Strouss, and also that the memorial be published in pamphlet form for distribution among the survivors and friends of the regiment.

Hon. Samuel Griffith, of Mercer, then delivered a splendid address, which was highly appreciated by the audience.

At its conclusion Capt. Strouss was called upon and favored the audience by singing "Larry O'Brien," "Think of Your Head in the Morning," and "Mrs. Johnson," which was loudly applauded.

The Greenville silver cornet band was present, and enlivened the meeting with their excellent music.

The meeting adjourned at 10 o'clock, every one pleased with the re-union and with the entertainment received.

The citizens cannot get too much praise for the interest they took in securing the comfort of the men of the Fifty-seventh during their stay, and they will long be remembered for the hospitality they extended to "the boys" on the occasion.

Petroleum Items.

A new well was struck at Personsville on Monday last, on the King farm, which is pumping about thirty barrels per day. The working interest is owned by S. P Boyer, M. Brownson and N. Persons.

Well No. 6, on the Emery Bros. & Colwell tract, struck about one week ago, is yielding one hundred and seventy barrels of oil per day. The well upon this tract struck about two weeks since, and reported at 200 barrels is now pumping about eighty.

MEADVILLE AGRICULTURAL WORKS.—All our agricultural readers in Crawford and Venango counties are interested in securing the best labor saving implements for farm labor that can be conveniently procured, and at such prices as the competition among manufacturers makes it advantageous to purchase. The Meadville Agricultural works, whose advertisement will be found in our columns to-day, are offering the farming interests of this section a variety of implements which are alleged to compare favorably with the best inventions of the age, viz: the Kniffen Mower and Reaper, the Atlantic Mower and Reaper, Buck's Feed Cutter, Threshers, Field Rollers, Harrows and Wood Mills. Both the Kniffen and the Atlantic Mowers stand in the front rank, the first having stood the test of competitive examinations in the industrial fairs of Ohio and Massachusetts; and the Atlantic Mower, brought out in 1869, is considered by competent judges unexcelled by any machine in the world. We commend to farmers an examination of these and other agricultural implements manufactured by the above company. Full descriptive circulars can be procured by addressing the officers of the company, whose names are appended to the advertisement.

MORE COUNTERFEITS.—Three dangerous counterfeits of Philadelphia banks are in circulation. One, an imitation of the tens of the Third National Bank, may be thus detected: On the right end border, near the top of the note, opposite the large figure 10, are the words "national currency." It will be noticed that the last c in currency is dropped out. The engraving of counterfeit twos on the Sixth National Bank is scratchy, and a five on the Consolidation National Bank is altered to twenty.

The one dollar greenbacks of the new issue have also been counterfeited. Their spuriousness can only be discerned by comparing them with the genuine.

THE people of Titusville are still "talking up" the question of annexation to Venango county. Seriously speaking we think that Titusville should be annexed to this county. Her interests are identical with those of the people of this county. She derives her support from the oil business of Venango county, and many of her citilens are engaged in developing our oil territory. For these and many other good reasons, we hope soon to see her a part and parcel of us.—*Pet. Centre Record.*

Letter from a Prominent Venango County Citizen on Annexation.

NEW YORK, Feb. 28, 1870.

Editors Morning Herald:

DEAR SIRS:—Since the defeat of the new county bill, and my arrival here, I have read your paper every day and have been highly pleased with your editorials on the subject of annexation. Your course is wise and the very best you could persue under all the existing circumstances, and certainly will meet with the hearty approbation of a large majority of our best citizens. The proposition should meet with no opposition from any person in Titusville. Annexation to Venango is most assuredly the best thing you can do now. If Crawford county could have had an oportunity to vote on your bill, she would have defeated it by an overwhelming vote; then why prolong this bitter and unpleasant contest in the Legislature? Let it be forever settled, by annexation; we will then all be friends; our interests are identical, our people are alike. Everything will move along prosperously. I hope you will continue to urge annexation in your paper, until people will get their eyes open and look to their interests, and view things in their right light; then we would make a glorious county, rich in the productions of the earth, rich in real wealth, politically healthy, and the greatest county in the State, entitled to two members of the Legislature under the new apportionment, and Titusville would always have one of them. What a great county we would have then, and how Titusville would grow and prosper. You have it in your power to become a great people, a great and prosperous city, if you will only seize the present opportunity. I hope you may see yourselves as others see you, and not let the golden opportunity pass, without being profited.

Hoping your efforts will be crowned with success,

I, am very respectfully yours. *

NEW YORK ELEVATED RAILWAY.—The Elevated Railway in Greenwich street, New York, is now completed for entire length, from the Battery to Thirteenth street. The motive power on this road is stationary, and consists of seven engines, each with two oscillating cylinders nine inches in diameter and fourteen inches stroke, and of thirty horse power. These engines are situated in vaults under the sidewalk, and are placed at intervals along the line The engine for each division turns a driving wheel, which propels an endless rope passing round a cylinder at the other extremity of the line. Attached to this rope at distances of one hundred and fifty feet, are small trucks with diminutive wheels, which run on a wooden track underneath and between the main track. These trucks are armed with a small slot, to and from which the passenger cars can be attached and detached by a lever in front, under the control of the conductor. The passenger cars run on eight wheels, and are built on a framework, protected by elliptic springs from the sudden jar of the rope when the connection is made with the truck. The wheels of the car are of wood, with iron tyes, and the motion is nearly noiseless. When it is desired to start the car, the conductor moves the lever, which is caught by the first truck, and the car is carried along until the lever is again detached, and the break applied to the axles.

SPECIFIC PERFORMANCE OF CONTRACT. The United States Supreme Court has recently decided that a father, who had verbally agreed to give a lot of ground to a lady about to be married to his son, provided that her money should be used to build a house for the home of the young people, could be compelled to execute a deed for the premises after the marriage had taken place and the house had been built with the lady's money. The son and his wife, after having lived several years in the house, removed and left the premises unoccupied. The father then took possession, and declared that he had changed his mind, and had determined not to make a gift of the property. The United States Supreme Court, however, decided that the building of the house, with the knowledge and consent of the donor, was sufficient evidence of part performance to take the case out of the statute of fraud, and that this was not a case for damages to the aggrieved parties, but for specific performance.

A MAGNIFICENT DONATION TO ALLEGHENY COLLEGE.—We see by the Meadville *Republican* that Joshua Douglass, Esq., of that city, has recently donated to Allegheny College, what is known as the College Boarding House property, valued at $30,000. This is a very munificent and meritorious act, and Mr. Douglass' example is well worthy of commendation and imitation.

At a meeting of the Board of Trustees of Allegheny College, held on the 22d day of February, 1870, the following preamble and resolutions relating to this subject were adopted:

Whereas, Joshua Douglass, Esq., of the city of Meadville, has made a conveyance to the President and Trustees of Allegheny College of several lots in said city, with a large building thereon, now known as the College Boarding Hall. Therefore

Resolved, That this act of generosity will confer great and permanent benefit upon the College, and that it entitles Mr. Douglass to the gratitude of the Board of Trustees, the Faculty, the Students and the friends of education everywhere.

Resolved, That a copy of these resolutions be given to Mr. Douglass, and that they be published in the city papers.

Extract from the minutes.

WM. MCLAUGHLIN, Sec'y.

TO MOVE OR NOT TO MOVE.—An important discussion and an earnest contest is now going on in regard to the removal of the Passenger Depot of the A. V. & O. C. Railroad from its present location on Monroe street, to the intersection of the railroad at Franklin street. Petitions and remonstrances have been in circulation amongst our citizens in support of, and in opposition to the removal, and we understand the case will come up for hearing to-day, before the railroad authorities at Corry. Large and varied interests seem to be involved in the decision, and therefore more than ordinary interest is taken in the result. It is our purpose to report the proceedings.

WE believe that the solid men of Titusville, those who take a vital interest in their thriving city, will, on examination, find that annexation to Venango county will be the source of untold prosperity to that city and its inhabitants. By coming among oil men and forming in law a part of the oil county of the world it needs no prophet to foretell their future. Why will they follow when they might lead? Why will they continue to be second when they might be first? Let them ponder on these questions and act to the best of their judgment. Whenever they come Venango will welcome them and kill the fatted calf.—*Oil City Times.*

The Crawford Judicial District.

An Act creating Crawford County a separate Judicial District.

Section 1. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, That from and after the first Monday in December, one thousand eight hundred and seventy, the county of Crawfoad shall be and form a separate and independent judicial district, to be called the Thirteenth Judicial District of the State.

Sec. 2. That there shall be four regular terms of court each year in said county, commencing the first Mondays of January, April, August and November, to continue three weeks each if the business shall so long require it.

Sec. 3. That the first week of court shall be devoted to criminal business and to such other business as may belong to the sessions, but if occasion requires it the criminal business may extend into the other weeks.

Sec. 4. That the court in session or the presiding judge and one or both the associates in vacation may order adjourned courts to be held for the trial of civil and criminal cases, and the despatch of other business, and order timely notice thereof to be publicly given and venires for the return of traverse jurors to be issued.

Sec. 5. That a president judge for said district shall be chosen in the manner now provided by law at the regular fall election of one thousand eight hundred and seventy, and be commissioned to enter upon his official duties the first Monday of December thereafter.

Sec. 6. That all acts inconsistent with the provisions of this act be and are hereby repealed. B. B. STRANG,

Speaker of the House of Representatives.

CHARLES H. STINSON,

Speaker of the Senate.

Approved, The twenty-fourth day of February, Anno Domini One Thousand Eight Hundred and Seventy.

JOHN W. GEARY.

PARIS BY SUNLIGHT AND GASLIGHT.—This is the title of one of the most beautiful, entertaining and instructive books ever published. It is sold by subscription and Wm. T. Ward is canvassing our city for orders. His district comprises Oil Creek, Troy, Steuben, Rome townships in Crawford county, and Plum, Cherrytree, Oil Creek and Cornplanter townships, in Venango county. The volume is illustrated with over one hundred and fifty engravings. It is a work of a vast amount of information and brilliant discription. It tells how Paris has become the gayest and most beautiful city in the world; how its beauty and splendor are purchased at a fearful cost of misery and suffering; how visitors are swindled by professional adventurers; how virtue and vice arm-in-arm in the beautiful city; how the most fearful crimes are committed and concealed; how money is squandered in useless luxury; and treats of all that is great, noble, generous, vicious, brilliant, startling, genteel or shabby, and of all that is interesting and worthy of notice in the beautiful city.

Every man of intelligence feels a personal interest in Paris, from which the best as well as the worst phases of modern civilization are derived; and from this volume every reader can obtain a more intimate acquaintance with Paris and the various features of Parision Life, than he could possibly gain by six-months' residence in that City.

It is printed from a beautiful, clear, new type, on fine calendered paper, made expressly for this work, comprised in one large volume of over 800 pages, embellished and illustrated with over 150 fine engravings of noted places, life and scenes in Paris, and will be furnished to subscribers in neat and substantial binding.

FROM HARRISBURG.—We have passed the Senate on Tuesday, incorporating the Western Pennsylvania Life Insurance Company of Pennsylvania. In the House the following bills were introduced:

By Mr. Webb—Joint resolution for final adjournment March 31. By Mr. Beans—Making the mode of selecting School Directors in the Commonwealth serve in the selection of jurors; also, regulating pawnbrokers. By Mr. Ames—Regulating the practice of dentistry. By Mr. McCreary—Reviving the State Military Agency at Washington. By Mr. Schnatterly—Extending the act of this session allowing railroad companies to lease and become lessees to the Pittsburg and Connellsville road. By Mr. Boileau—Urging Congress to repeal the present income tax law because it is inquisitorial and oppressive, and questionable because it is a direct tax. By Mr. Buffington—Providing that any election officer who shall refuse to receive and count the vote of any citizen on account of race, color or previous condition of servitude, shall be guilty of a misdemeanor punishable by fine and imprisonment. By Mr. Parsons—Joint resolution directing the Governor, Attorney General and Auditor General to urge the General Government to pay border and raid claims.

NUNNERIES.—A bill is now pending in the Legislature, based upon the belief that women are confined in nunneries against their will. It confers upon any three judges in the different judicial districts the power to examine, and further directs them to visit the nunneries, convents or cathedrals situate therein at least twice a year. The judges are to have power to summon all the females inmates, each singly, unaccompanied by any one else, and are to propound the question: "Are you contented and satisfied to remain in said convent, nunnery or cathedral?" Those wishing to be released are to be permitted to leave without further ceremony. Other provisions of the bill are designed to restore to such inmates as desire to leave any property of theirs which may have passed into possession of the officers of the institution or have been appropriated for the use of the Church during their stay. There are a number of penalities provided against any persons obstructing or resisting the execution of the law. Of course, the value of such a law depends upon the question whether there is such arbitrary confinement; this could be equally well ascertained by legislative inquiry. There seems to be no provision to repay the expense of board and lodging that the dissatisfied nuns may have incurred. If, however, there exists in the United States a class of prisoners guilty of no crime and desirous of freedom, whom the habeas corpus cannot reach, it is time the matter should be investigated. This bill seems rather crude, but it may prove of service by attracting attention to a possible method of unjustly restraining individual liberty.

THERE may be found at the store of Henry White & Co. a varied list of Lubins, Rimmels, Phaunds, and Colgate's fine toilet soap

EVERY SATURDAY at HOWE'S.

SUEZ CANAL.—M. Lesseps' last report as to the condition of the Suez Canal is very favorable. It states that the mushy discussed rock at Serapeum, which had not been removed when the canal was cut, has been cut out, and that very large ships can now pass without interruption from sea to sea—that is from Port Said to Suez—not such monsters as the Great Eastern and the Great Britain (the latter now a passenger and freight transport between Liverpool and Australia,) but large vessels in the mercantile marine service. Sir Stafford Northcote, who was Secretary for India in 1867-8, and went to Egypt with the express intention of carefully examining the Suez Canal, is satisfied that its success will be great and permanent. It must greatly shorten the distance from Europe to the East. From London to Calcutta by the Cape route was 11,740 miles; by the Canal, 8,070 miles. From London to Bombay by the Cape route was 11.000 miles; by the Canal route, 6,000 miles. The saving in time and distance will be immense.

TAXES OF HOTEL KEEPERS.—The hotel keepers of the United States are taking concerted action to obtain from Congress the repeal of that part of the Internal Revenue laws which imposes a tax rated at five per cent. on the rent of the hotel. It is asserted that the revenue taxes paid by hotel keepers are seven and a half times greater than those paid by merchants on the same amount of capital, and the effect of the five per cent. tax on rentals does not accord with the intentions of Congress.

LOCAL NOTICES.

SAFE LIGHT FOR OUR HOMES.

MR. EDITOR: Permit us to say a word in behalf of our firesides, at least where gas is not used, or if so, at an expense which is a burden.

We neither make nor sell the Lamp which we commend; we refer to PERKINS & HOUSE'S *Non-Explosive Benzene Lamp.* PROF. J. H. SEELYE, of Amherst College, was mainly instrumental in its introduction to the people of New England, because he saw in it a public blessing.

It is *perfectly safe.* Nothing that can be used for illumination will explode in it, while the light is exceedingly brilliant, steady, and is entirely inoffensive as to odor, and the expense less than one-half that of gas.

Messrs VOTAW & MONTGOMERY, of Courtlandt Street, N. Y., General Agents for the United States, are recent graduates of a New England college, and men of the highest character. The interest of the public in such protection to life, alone, rises above all mere business competition or profits: it has an importance solitary and unrivaled in its claims; and these are sustained by the best names in the scientific and literary world.—*Congregationalist.*

Messrs A. M. ARTCHUM & P. WOOD are now canvassing this city to introduce this Lamp. Headquarters at Ballantine's, South Franklin Street, where the Lamps can be seen and examined. 1mar3d

THE

KNIFFEN MOWER

WAS AWARDED THE

First Premium and Gold Medal

At two of the largest Field Trials for Mowers ever held in the United States, viz: At Xenia, Ohio, July, 1868, and at Amherst, Mass., June, 1869, coming there in competition with all the best Machines, and passing a most thorough examination and trial by a committee eminently qualified to decide correctly. We think this—with some Five Thousand in successful operation in the field—sufficient evidence of the excellence of the Kniffen Mower.

THE

ATLANTIC MOWER

First went to the field in the harvest of 1869, and proved itself a FIRST CLASS MACHINE, having many advantages not possessed by any other, and now, with the improvements upon it, we say, without any hesitation, that

IT IS NOT EXCELLED BY ANY MACHINE IN THE WORLD!

And we offer it to the Farmers for the harvest of 1870 with the utmost confidence.

Our Machines are warranted to be made of the best material, by the best workmen, and to do work in the field equal to any in the market, with prices as low as any of like quality.

We respectfully ask and trust that we be allowed a fair trial to compete, quite willing to rely on the performance of our machines for success. Send for circular

A LOVE SONG.

Wovens wie ein sanger powl,
Do fly smallest hoomp—
Vouldt shveet de seas from bole to bole
Und if she vere a clofer-flolat
I'd bet-mine only peace,
It vouldn't be no dime at all
Before I'd shoomp de fence

Ve hear de birds voice it drilling so,
Dey vishly seems to hoert;
Ve hit de bobbed animiles
Dat roons oopon de durt
De re'nbow rises ven she sings,
De sun shine ven she dalk,
De angels crow und flap deir vings
Ven she goes out to walk.

So livin vhite—so carnedine—
Mine lofe's comblex on glow,
It's snoost like abendcarmosine,
Each pleasant on de show
Mit mollmake ploshes in her cheek,
As sommer rods de wein,
Or sonlight sends a fire-flash troo
An blank karfunkelstein

De neberschwenzhare idees
Dis lofe put in my mind,
Vould make a foostato philosoph
Of any human kind
Tis shuderend sweet on ear't to meet
An hummlisch—hoolisch qual,
Und treat mit whiles to kummel schnapps,
De Scenehistandeal
—[Hans Breitmann Ballads—Third Series

Mr. Moncure D Conway has visited Mr. Tennyson at Faringford, and he says that the poet stands in his memory "as the Prospero of an enchanted isle."

The Dr Pangloss of Mr John S Clarke is pronounced by the London critics to be the best piece of acting seen in that city since Mr. Jefferson's Rip Van Winkle.

The families of the members of the Jewish Club in Chicago are admitted to all the privileges of the reading room the theatre, the billiard room and the bowling alley.

A young boy in Illinois, a few days ago, laid a train of powder through the kitchen and then fired it, just to scare ma." He hasn't been able to sit down with any comfort since.

A trial in an English court is thus described by a Chinaman: "One man talk quite silent, another talks all the time and twelve wise men condemn the man who has not said a word."

Elise Holt has played to "shockingly small audiences" in Chicago, but this doesn't indicate a rise in Chicago virtue for Lydia Thompson has filled the Crosby opera house from pit to dome.

A Baltimore woman sent her grocer the following note: "Mr Tuttle This here thing has got too much hemp in it for molasses, and not quite enough for clothes line, so I beg you will exchange it for a purer article."

Large Sales of the 7 PER CENT. 40 YEAR GOLD BONDS OF THE Chicago, Danville & Vincennes RAILROAD

have enabled the Company to provide liberally for the wants of the coming season. Among their recent purchases are 9,650 tons of the best iron rail, 40,000 white oak cross ties, delivered, and

20 FIRST-CLASS LOCOMOTIVES,

besides 130 freight and a considerable number of passenger cars The road already built from Chicago to Momence is the very best, having 2,800 extra sized ties to the mile, a 56 pound rail connected throughout with fish joints, and all laid in the firmest manner The part yet to be built will be in every respect as good. Everything is being made ready to accommodate the large business that is sure to press upon this road as soon as it shall open to traffic and travel. The

FIRST MORTGAGE BONDS

of the Company, bearing 7 per cent Gold Interest, payable in the City of New York on the first day of April and October, in sums of 1,000 each, are still offered at

95 AND ACCRUED INTEREST.

Many persons consider them the best security on the market and prefer them to the bonds of any other railroad They are issued at the rate of only $18,000 per mile of completed road, and are secured by

FIRST MORTGAGE,

upon the road. The franchises, all present and future acquired property of the Company, and net income of the road. The

SINKING FUND,

created and set aside from the annual earnings, amply provides for the redemption of the bonds at maturity. They are coupon bonds, but may be registered at the option of any holder, and are subject to successive registration and delivery.

THE UNION TRUST COMPANY,

of New York, being the Official Register and Transfer Agent of the Company No Bonds can be made more perfect in form, or more absolutely safe.

Exchanged for Governments, they pay a handsome present profit, besides a large difference in interest. Pamphlets, with Maps and detail, and the Bonds, may be obtained directly of us, or of our advertised agents.

TO OIL OPERATORS.

TORPEDOES!

THE ROBERTS' PETROLEUM TORPEDO COMPANY

Office at the Red Plaining Mill.

Corner of Pine and Second Sts.

(Near the Railroad,)

Titusville, Pa.

Owing to the large and increasing demand for the Roberts' Torpedoes, and the late decision of the Commissioner of Patents in refusing to Wm. Reed a patent, and the decision of Judge R. G. Grier sustaining the Roberts' patent they have LOWERED the price of their Torpedoes

Twenty per Cent,,

so that every Operator can afford to try a Torpedo before abandoning a Well.

The following is the decision rendered by Judge Grier on the twenty-second (22d) day of September, 1869, in the United States Circuit Court at Philadelphia. The case was argued three days by Charles M Keller of New York, B F Lucas and S A Purviance of Pittsburgh, for defendants, and George Harding of Philadelphia, and George H Christy, of Pittsburgh, for plaintiff

OPINION OF JUDGE GRIER

As I write with difficulty I can only state the conclusions to which my mind has come after a careful examination of this case

The complainant has exhibited a patent dated 25th April, 1865 This is prima facie evidence of a good title, and puts on the respondents the burthen of proof that the patent is void or worthless

I need not repeat my remarks in the case of Goodyear vs Day (2 Wall, C C Rep 299) but now adopt them as affording a rule or decision which applies clearly to the present case

As the infringement of the patent is admitted, he only question will be as to the validity of complainant's patent of April 25, 1865

"It was after speculation had been reduced to practice, and after repeated experiments, that the complainant succeeded in overcoming the prejudice and ignorance of the people on the subject and persuading the public that his invention was useful after he had established its great utility and value, and when the genius and patient perseverance, in spite of sneers and scoffs were completely successful, that Reed, who had before made experiments on the same subject, and was wholly unsuccessful, imagined that he had the best right to the invention, and after purchasing one or more of complainant's torpedoes he applied on the 1st of November, 1867, for a patent for substantially the same combination of devices or machines contained in complainant's patent. On the 15th of the same month the respondents formed themselves into a company or corporation called "The Reed Torpedo Company," for the purpose of pirating the complainant's invention and supporting the expense of litigation and thus defraud him of its fruits. They have persevered, even after the preliminary injunction every properly granted by the District Judge

"Let a decree be entered for complainant for a perpetual injunction, and a Master appointed to take an account according to the prayer of the bill.
R C GRIER, Circuit Judge

NOTE—The passage referred to by Judge Grier in his former decision 2 Wallace, p 299, adopted as applicable to this case was as follows

"It is usually the case when any valuable discovery is made, or any new machine of great utility has been invented, that the attention of the public has been turned to that subject previously, and that many persons have been making researches and experiments Philosophers and mechanicians may have in some measure anticipated in their speculations the possibility or probability of such discovery or invention, many experiments may have been unsuccessfully tried coming very near, yet falling short of the desired result They have produced nothing beneficial. The invention when perfected, may truly be said to be the culminating point of many experiments, not only by the inventor but by many others He may have profited indirectly by the unsuccessful experiments and failures of others, but it gives them no right to claim a share of the honor of the profit of the successful inventor. It is when speculation has been reduced to practice, when experiment has resulted in discovery, and when that discovery has been perfected by patient and continued experiments, when some new compound, art, manufacture, or machine has been thus produced which is useful to the public, that the party making it becomes a public benefactor and entitled to a patent

"And yet when genius and patient perseverence have at length succeeded, in spite of sneers and scoffs in perfecting some valuable invention or discovery, how seldom is it followed by reward! Envy robs him of the honor, while speculators, swindlers, and pirates rob him of the profits. Every unsuccessful experimenter who did or did not come very near making a discovery now claims it Every one who can invent an improvement or vary its form, claims a right to pirate the original discovery We need not summon Morse, or Blanchard or Woodworth to prove that this is the usual history of every great discovery or invention

"The present case adds another chapter to this long and uniform history"—2 Wallace, C. C Reports p 299

CAUTION.

The public is cautioned against employing any but the regularly authorized Agents of the Company, since the Roberts Patent cover the use of the Torpedo and all explosive materials for oil Well and the use of such materials by other parties is a direct infringment of their rights Any parties infringing any of the ROBERTS PATENTS will be dealt with according to law and as acting wilfully and knowingly in defiance of law and the decisions of the Courts

The Company have re organized their business with a view to accommodate Oil Men in every part of the Oil Region They have employed the most efficient Agents and Assistants that can be procured for the business Each Torpedo is labelled with date of patents, together with the price of the Torpedo, and signed by an officer of the Company, so every Operator wishing a Torpedo may know its price and whether it came from our office

Operators will confer a favor by reporting to this Office any negligence of Agents

The following named persons have been appointed Agents and Assistant Agents for the Oil Region of Pennsylvania and West Virginia

TO OIL OPERATORS.

TITUSVILLE PIPE COMPANY.

OFFICE OF THE TITUSVILLE PIPE COMPANY, TITUSVILLE, Jan. 1, 1870.

The following are the conditions upon which the TITUSVILLE PIPE COMPANY transport Petroleum

1st An allowance of two (2) per cent will be claimed and collected by the Company on all oil when received by them.

2d All oil in the custody of the Company is entirely AT THE OWNER'S RISK OF LOSS BY FIRE, whether in tanks at stations or in transit.

3d No oil will be received for storage purposes. Ten (10) days time is allowed owners within which to remove their oil, if not so removed, it will be entirely at the owner's risk of loss from whatever cause occurring whether by fire, breakage of tanks, shrinkage or evaporation.

4th In case of oil not removed within the time specified above it will be chargeable with the shrinkage and evaporation that may result therefrom during the time such oil remains in the custody of the Company, at the ascertained rate of such losses for the time and season.

5th Transportation and other charges are required to be settled before oil is delivered.

18feb-1y CHAS F HATCH, SUPERINTENDENT.

OIL STORAGE.

OFFICE OF THE ALLEGHENY TRANSPORTATION CO, TITUSVILLE AUGUST 12, 1869

The following resolution was passed at a meeting of the Board of Directors of this company this date

That on and after this date NO CHARGE FOR STORAGE OF OILS shall be made, the tanks of the Company being used for the accommodation of THEIR PATRONS FREE OF CHARGE

Also all oil now, or that may be hereafter held in tanks of the Company, shall be at the OWNER'S RISK for any loss that may arise by fire, leakage, evaporation, or breakage of tank.
